

I understand that the CBA is petitioning you to be allowed to make calls to people at home who are on the Indiana no call list. This would be a great injustice to us who have elected to be on this list.

I would like this list expanded to include businesses to as we receive several junk calls a day from some very irritable and unprofessionable people. If you think the no call list is a bad idea let me have your phone number and I will give it to some of these people so you can find out first hand.
